SUMMARY

Final-year Computer Science Engineering student with strong hands-on experience in backend development using Node.js, Express, MongoDB, and RESTful APIs, along with frontend development in React.js. Actively working on AI-integrated applications, including intelligent chat systems using large language models. Passionate about AI-driven automation, scalable backend systems, and production-ready software solutions. Highly adaptable, quick learner, and motivated to work in global, technology-driven environments.

INTERNSHIP

Software Engineer Intern @Noukha Technologies Oct 2025 - Present

- Developing production-ready mobile applications using React Native with backend API integrations.
- Working closely with backend services to consume RESTful APIs, handle authentication flows, and manage real-time data.
- Implementing reusable UI components and optimizing application performance for better stability and user experience.
- Contributing to feature testing, bug fixing, and code maintainability, following industry-standard development practices.
- Gaining hands-on exposure to real-world business workflows and scalable application architecture.

Frontend developer (Intern - remote) @Cognifyz Technologies Jan - Feb 2025

- Built responsive and user-friendly web interfaces using HTML5, CSS3, JavaScript, and React.js.
- Collaborated with designers and backend developers to translate UI/UX designs into functional web components.
- Integrated frontend components with backend APIs to ensure smooth data flow and user interactions.
- Improved code quality, responsiveness, and cross-browser compatibility.

PROJECTS

AI Chat Application

- Developed an AI-powered conversational system using React, Node.js, Express, and Gemini API, enabling context-aware responses. Designed backend APIs for prompt handling, session management, and scalable AI integration, simulating real-world back-office automation use cases.

E-commerce Application

- Built a full-stack e-commerce platform with React, Node.js, Express, and MongoDB, implementing secure APIs for product management, orders, authentication, and admin workflows. Designed the system with scalability and real-world production usage in mind.

TECHNICAL SKILLS

Frontend: NextJs, ReactJs, JavaScript, HTML5, CSS3, Figma

Backend & APIs: Node.js, Express.js, RESTful APIs, TypeScript (basic), Python, MongoDB

Software Engineering: Agile methodology, Clean code practices

AI & Automation:

- AI-powered applications (LLM-based chat systems)
- API-based AI integration (Gemini API)
- Prompt engineering basics

DevOps & Infra (Entry-Level):

- Git & GitHub
- Basic Linux commands
- Environment configuration & build processes

EDUCATION

Bachelor of Engineering in Computer Science and Engineering. 2022 - 2026 (Present)

Anna University Regional Campus, Coimbatore
CGPA - 7.5

Higher Secondary Certificate 2020 - 2022

Government Higher Secondary School, Unathur
Percentage - 79%

SOFT SKILLS

- Problem solving
- Self-Motivated
- Quick learner
- Adaptability
- Open-minded

CERTIFICATES

- Certification of Android App Development
- Certification of Web Development
- Certification of MongoDB

LANGUAGES

- English
- Tamil
